

SKUDO TACK-MAT EDGE PROTECT

PEEL &
STICK

ONE-STEP TEMPORARY SURFACE PROTECTION

Skudo Tack-Mat New Edge Protect offers the same outstanding protection of Skudo Construction Tack-Mat, but has been specifically designed for easy application around edges. Edge Protect is perfectly sized to protect indoor framing, windows, ledges, railing, door jams, and more. No need to cut down rolls, eliminating excess waste. Like all Skudo Tack-Mat products, Edge Protect features a unique self-stick surface - simply peel the backing paper and apply. Skudo Tack-Mat Edge Protect provides interior surface protection for commercial and residential projects for up to 12 months.

PRODUCT DATA

Dimensions	Product SKU
200mm x 15m (3m ²)	SKUDOTMEP

BENEFITS

- Strong bond with the surface blocks any dirt and debris from ever coming into contact with the protected substrate
- Impact protection from carts, ladders, tools, and more
- Stain proof protection from small spills of chemicals, solvents, paints, oils etc
- Seamless and stationary - won't move out of place
- Can be used in any temperature: -10°C to +50°C
- Easy to adjust or inspect surface, simply peel up and reposition

USES

Protects all edges during construction / remodeling including:

- Glass and metal framing, ledges, and railing
- Ceramic and porcelain tile
- Most marble, granite, and stone (Not to be used on bluestone and limestone)
- Vinyl, laminate, and hardwood*
- No acrylic surfaces

APPLICATION AND REMOVAL

Skudo Tack-Mat Edge Protect is easily applied by peeling off the release paper and pressing down onto the surface. Simply peel up Edge Protect leaving a clean, undamaged surface. Removal temperature 10°C-45°C.

* Only use Skudo Tack-Mat on sealed hardwood with a hard wearing factory finished surface (eg: Aluminum Oxide).
